Carbon Reduction Plan 2026

Carbon Reduction Plan

Supplier name:Mama Bamboo Ltd

Publication date: ...10th October 2026

Commitment to achieving Net Zero

Mama Bamboo Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations.	
4 FTE working from home in houses powered by Bulb and Octopus Green energy. Minimal commuting and office requirements. Majority of emissions stems from production of goods by third parties and sea freight.	
Baseline year emissions: 2022	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	Product Purchases - 452 Stationery - 8 Homeworking - 2,478 Commuting - 1,658
Scope 2	

Carbon Reduction Plan 2026

Scope 3 (Included Sources)	Production of goods and sea freight - 245,956
Total Emissions	250,552
Carbon Offset	-53,033
Net Total Emissions	197,519

Current Emissions Reporting

Reporting Year: 2025_2026 FY	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	Commuting - 706
Scope 2	UK distribution - 3586
Scope 3 (Included Sources)	Products – 145390 (inc sea freight)
Total Emissions	149,682
Carbon Offset	-150,000
Net Total Emissions	zero

Carbon Reduction Plan 2026

Net and Gross Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following gross carbon reduction target.

Carbon Intensity: 25/26 - Carbon Intensity by Revenue 0.147 kgCO₂e

Carbon Intensity has been reduced this year as carbon emissions fell significantly due to a change in packaging material for all major product lines.

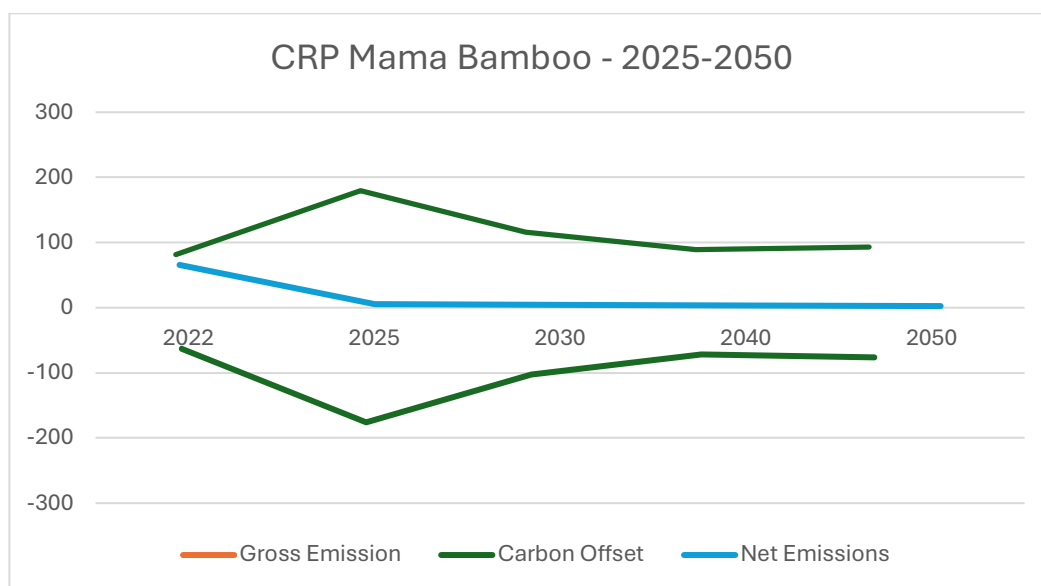

We project further reductions for carbon intensity per £ revenue over the next five years
This will be achieved through increased use of solar power manufacturing

Ongoing Carbon Offset:

Mama Bamboo will continue to offset all residual carbon through the ONCRA approved Bamboo Village programme thereby continuing our achievement to operate a Net Zero business.

Mama Bamboo has already achieved Net Zero and we will continue to achieve a Net Total Emissions below 90% of between 2027 and 2030. In further reductions in gross emissions

Progress against these targets can be seen in the graph below:

Carbon Reduction Plan 2026

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the baseline.

- Solar Powered Production - Over half of nappies and pants manufacture is conducted using solar power in new factories. Mama Bamboo transferred 100% wet wipe manufacture to a 100% solar powered factory in 2026
- Sea Freight Consolidation – Mama Bamboo utilised more space capacity per container ship by packing without pallets to achieve a 15% reduction in per container sea freight emissions.
- 2025 - Transferred all major product lines to PCR packaging

To combat our impact on the carbon climate, Mama Bamboo offsets all its residual carbon through the ONCRA-approved Bambo Village Afforestation Scheme. Last year, Mama Bamboo offset 100% of the prior year's residual emissions.

Carbon Reduction Plan 2026

Next Steps Carbon Reduction Initiatives

Solar Power

In 2025, Mama Bamboo transition wipe production to a solar powered factory. Nappy and nappy pant production is currently undergoing a transition to another solar powered manufacturer. This will be completed in 2026.

UK Delivery

Mama Bamboo will be introducing green last mile delivery options to customers in 2026. It is estimated that 30% of current customers will engage with this scheme and help us to reduce emissions in UK freight.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.
