

Corporate Near-Term Tool

Version: 2.3
Support: info@sciencebasedtargets.org

Scope 1&2 Tool User Guide

Section 1: Input emissions and activity data as required by the selected Target Setting Method. Required input fields are highlighted in yellow.
Section 2: Summary of emissions reduction target data and visualizations, Sector-specific intensity convergence / Sectoral decarbonization approach (SDA).
Section 3: Summary of emissions reduction target data and visualizations, Cross-sector absolute reduction / Absolute contraction approach (ACA).
Section 4: All target modelling output data, SDA & ACA.

Section 1: Input data

Enter your Company name	Beijing Bata Medical Consulting Co., Ltd
Target setting method	Absolute Contraction Approach
SDA location	Not applicable
Base year	2022
Target year 1 (SC)	2025
Target year 2 (SC)	2030
Target year 3 (SC)	2035
Target year 4 (SC)	2040
Target year 5 (SC)	2045
Most recent year (SBTi)	2022

IMPORTANT NOTICE

This Tool is intended to support companies in their modelling of science-based emissions reductions targets, as well as to assist companies and interested third parties in assessing and evaluating corporate targets. However, to be approved by the Science Based Targets initiative, companies need to make sure their target(s) fulfil the SBT criteria. Please review the SBT Step by Step Process to access the latest criteria and resources: <https://sciencebasedtargets.org/step-by-step-process>

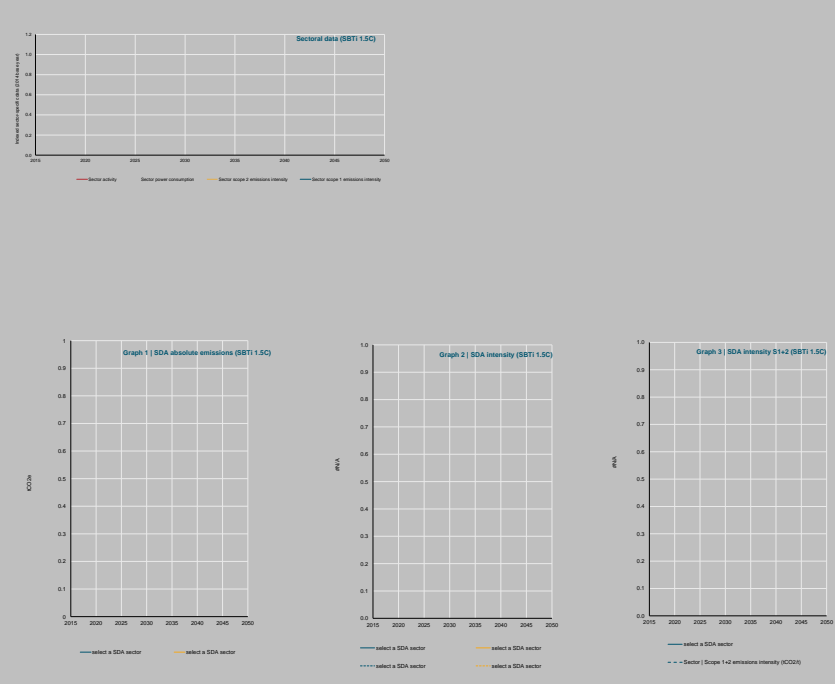

Also please note that the SBTi issues "forward-looking" ambition of target(s) by using the year the target is submitted to the initiative (or the most recent GHG inventory). For further information, consult the SBTi Corporate Net-Zero Standard: <https://sciencebasedtargets.org/resources/files/Net-Zero-Standard-Corps.pdf>

Please help us improve this tool by reporting issues related to functionalities and formatting.

Update notification: Please note that as of July 15th 2022, SBTi Tool version 1.2.2 and earlier are no longer supported. For clarifications on tool version eligibility please contact info@sciencebasedtargets.org.

Please see results in Section 3 below

Section 2: Sector-specific intensity convergence / Sectoral decarbonization approach (SDA)

Section 3: Cross-sector absolute reduction / Absolute contraction approach (ACA)

1.5 degree scenario (1.5C)

[Review all target modelling data](#)

	Base year (2022)	Same as base year	Target year (2035)	% Reduction to date	% FLA Adjustment	% SBT reduction
Scope 1 emissions (CO2e)	34	---	26	---	Not required	42.00%
Scope 2 emissions (CO2e)	26	---	16	---	Not required	42.00%
Scope 1+2 emissions (CO2e)	62	---	36	---	---	42.00%
