

Riverwater Partners Climate Reporting 2024

Net Zero Emissions

Riverwater’s business, by its nature, does not produce a significant carbon footprint. However, we understand that climate change is one of the most pressing crises of our time, demanding the attention of all, which is why we recommend to all companies in which we invest that they focus on this important factor, and why we do, as well.

During 2024, Riverwater’s Greenhouse Gas (GHG) footprint was the equivalent of **34 megatons CO2e** (vs 34mT CO2e in 2023):

Riverwater purchased carbon offsets from TerraPass, which directs money to projects that remove carbon from the atmosphere, and “offset” our carbon emissions.

Target Setting

Riverwater Partners has set goals to reduce our GHG footprint per unit of revenue, or our carbon intensity, as we grow our business.
